

Services

Are you finding critters in your home or business? If so, give us a call! Duncan Wildlife Control uses exclusion methods that are guaranteed to keep pests out without compromising the visual integrity of your home or business. We can also provide solutions to counties and municipalities through yearly contracts or one-time services. We clean eaves troughs and trim tree branches!

Eaves troughs that are blocked and holding water can contribute to the decay of building materials. This can lead to possible entry points for animals such as raccoons, squirrels and bats. We will clean and remove all debris as well as inspect for structural damage. Tree branches that rub on the roof or sides of your home can also cause damage as well as provide a route of entry for raccoons and squirrels. We will safely trim branches away from structures and repair damage to prevent or eliminate infestation.

We also remove dead animals from homes and businesses and provide odour control solutions to help remove any unpleasant smells.

When you hire Duncan Wildlife Control you are hiring a company that eats, sleeps and breathes wildlife control. Our goal is to provide quality, permanent solutions to protect your investments. You can sleep easy knowing that you have hired Duncan Wildlife Control!
